The **Visual** and Automated Disease **Analytics** Program
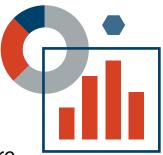

Student & Faculty Information Session

December 7, 2020 • 2:00 – 3:00 pm (CT) • Online event
Registration required to access webinar connection link.

The Visual and Automated Disease Analytics (VADA) Program trains health, health informatics, and computational science graduate students to translate complex health data into insights that can be used to improve the health of populations and support health care decision-making.

The VADA Program welcomes interested faculty and graduate students to learn about how they can get involved and funded through the program.

If this sounds like an opportunity for you, RSVP by **December 6, 2020** at:
